

Specialist Immersion Experience – Technical Production

Queensland Ballet invites Tech Crew to the Thomas Dixon Centre! Join us for an engaging Immersion Experience designed for Technical Production and Performing Arts students, that aligns with curriculum and co-curricular interests. This unique program offers exclusive behind-the-scenes access, hands-on workshops, and Q&A sessions with Queensland Ballet's expert Technical Production team. Students will explore how lighting, sound, and projection bring depth and engagement to performances, gaining practical insights into the power of production elements to shape meaning in art-making and live events.

What to Expect

- **View a Company Class or Rehearsal:** Observe Queensland Ballet's Company dancers in action, capturing the connection between performance and production elements that enhance the art form's impact on audiences.
- **Exclusive Access to Thomas Dixon Centre's Technical Facilities:** Students tour the iconic Thomas Dixon Centre, focusing on the Talbot Theatre and backstage spaces. This access provides a firsthand look at the intricacies of staging a professional performance.
- **Practical Sessions with the Technical Production Team:** Engage in hands-on workshops with experts in lighting, sound, and projection. Students gain practical skills using the technology and equipment in the Talbot Theatre, seeing firsthand how these elements are integrated to elevate storytelling in dance.
- **Personalised Q&A with Industry Professionals:** Students participate in a Q&A with the Head of Technical and team members, exploring career pathways, techniques, and behind-the-scenes insights into technical roles in the performing arts.
- **Tailored Content for Each School:** We can collaborate closely with schools to further customise the experience, aligning activities with students' current coursework or co-curricular foci, interests, and skill levels to ensure maximum relevance and impact.

Inspiration for aspiring artists and technicians: This immersive experience empowers students with new skills and creative insights, supporting their growth as future artists and technicians. Aligned with the ACARA Version 9 curriculum, this program enhances Critical and Creative Thinking, as well as Personal and Social Understanding, making it an inspiring and holistic learning opportunity in the arts.
